Flottweg's Xelleter Series Awarded Prize for Technical Innovation

The Xelleter series by Vilsbiburg company Flottweg has been awarded the "technical innovation" seal of approval at this year's SMAGUA water trade show. The Technical Innovation Contest is supported by industry leaders, who evaluate candidate products each year. Products are evaluated on the bases of quality, environmental awareness, sustainability and safety in the workplace. The award for the Xelleter series is a clear recognition of Flottweg's exemplary work.

With 24,000 visitors and 625 exhibitors from 29 countries, this year's SMAGUA show ended on February 7. Upon the show's conclusion, its reputation was confirmed as the most important location for the national water sector.

The award can be considered the highlight of the three-day show. A jury of four, led by María Luisa Claver Barón, presented the awards at a festive ceremony. This seal is awarded to products that make a valuable contribution to optimally satisfying current market needs via innovation and solid performance.

"This award is the result of the excellent work of our development team. We consider it an immense honor for the Xelleter series to be recognized to this extent, especially internationally," said Nils Engelke, PR and communications manager of Flottweg SE, at the event.
