

# **SUCCESS IS... TAKING OVER TOGETHER RESPONSIBILITY FOR ENVIRONMENT, HEALTH AND SAFETY.**

## **PRINCIPLE**

As an internationally operating manufacturer of decanters, belt presses, disc stack centrifuges and systems for solid liquid separation, it is our important objective to protect our environment as well as our employees' health and to provide a safe working environment. Our products assume key roles in many environmental technologies, thus contributing to sustainability in our customers' processes.

We are committed to eliminating dangers and reducing the risk of accidents, injuries, and illness due to work. In order to continuously improve our job safety performance, we integrate health and safety protection into our corporate processes. In our manufacturing processes we strive for saving resources and for using modern technological processes in order to do as little harm as possible to the environment.

## **EVERYBODY CAN CONTRIBUTE**

Our directors, workers' council representatives, and executive managers set a good example, motivating employees to actively contribute to environmental protection and to job safety. We encourage each individual in his or her responsibility to contribute to a safe working area and consequently prevent dangers. We want everyone to observe and critically scrutinize their own and their colleagues' behavior concerning job safety and environmental protection, and to point out any unsafe situations.

## **JOB SAFETY FROM THE VERY BEGINNING**

We are committed to observing legal requirements. Moreover, we develop targets for environmental, health and safety protection that we additionally want to fulfill. Right from the beginning, we actively integrate job safety and environmental protection into our business processes.

## **RISK MANAGEMENT**

We constantly apply systematic processes to evaluate environment and work-related chances and risks. Where we cannot completely eliminate the risks, we take technical, organizational and personal protection measures. With regular health check-ups, we underline the importance of health and safety protection at work.

## **MANAGEMENT SYSTEM**

By introducing a management system for environmental protection as well as for health and safety at work, we specifically encourage the awareness within our company. By taking efficient prevention and protection measures as well as active involvement of our employees, we encourage environmental protection as well as job safety performance.
