Whether you are working with a Flottweg machine for the first time or want to deepen your practical knowledge: The Flottweg Academy in Vilsbiburg offers you a wide range of training programs so that you can work even more efficiently with your Flottweg machines in the future and thus be more successful.

In our training courses, we are careful to keep the groups very small (max. 4 participants) so that we can involve and reach every participant. Each training course consists of a practical and a theoretical part, as well as a workshop day on a machine. Our training courses are designed to be as focused on your product as possible. The training units are delivered in a relaxed manner using practical examples on our training machines.

The following pages show you the typical structure of a standard training session.

# FLOTTWEG ACADEMY

# DAY 1 EXPERIENCE AND UNDERSTAND FLOTTWEG

## Introduction

- Welcome and introduction
- Flottweg history and today

## Factory tours

- Follow us along the value chain from receipt of goods to delivery to see how we manufacture your centrifuges.
- During the tour, comparisons are drawn with the components of your Flottweg units.

## Theoretical training

- Fundamentals of centrifugal separation and decanter technology
- Q&A about your centrifuges

# DAY 2 WORKSHOP

## Practical machine workshop

- Function of the components of the respective Flottweg units
- Comparison of your Flottweg unit with the training unit
- Maintenance and repair work
- Tips and tricks for handling Flottweg units in daily use

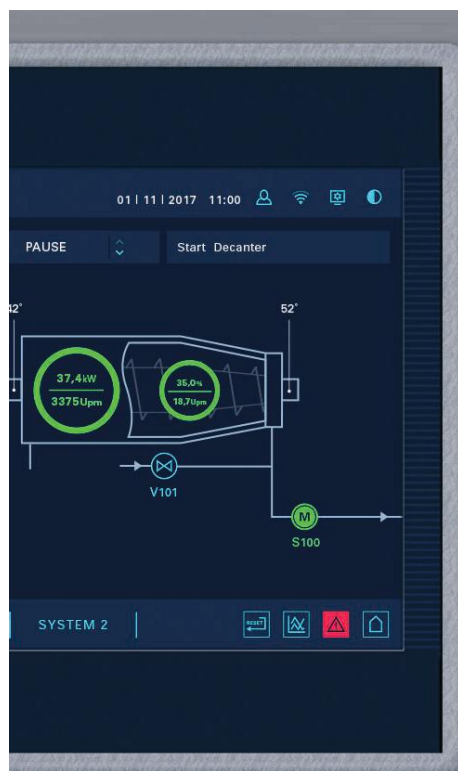

## Control technology and troubleshooting

- Functions of the control system
- Malfunctions and shutdowns

## Concluding thoughts

- Q&A about your Flottweg unit
- Feedback on the training
- Handover of the certificate of participation
